

# KESHAV AGARWAL

Bijnor , Uttar Pradesh

☎ 701-754-0010 ✉ [agarwalkeshav185@gmail.com](mailto:agarwalkeshav185@gmail.com) [linkedin.com/in/keshav9880/](https://www.linkedin.com/in/keshav9880/) [github.com/KeshavAgarwal989](https://github.com/KeshavAgarwal989)  
💻 [leetcode.com/u/agarwalkeshav99](https://leetcode.com/u/agarwalkeshav99)

## Education

**Indian Institute of Information Technology, Una**

*Bachelor of Technology in Computer Science - CGPA:8.99 (Current)*

**Nov. 2022 - June 2026**

*Una, Himachal Pradesh*

**Blue Birds International School, Mandi Dhanaura**

*Percentage (PCM-CS): 98.8%*

**2020 - 2021**

*Dhanaura, Uttar Pradesh*

## Relevant Coursework

- Data Structures
- Machine learning
- Database Management
- Computer Architecture
- Algorithms Analysis
- Artificial Intelligence
- Operating System
- Computer Networks
- Object Oriented Programming

## Projects

### Image Classifier

*March 2024 - April 2024*

- Developed a CNN-based image classification model with 95% accuracy in distinguishing over 4 different animal species, processing a dataset of 1500+ images.
- Utilized Python, TensorFlow, Keras, NumPy, Pandas, Matplotlib, and Google Colab to design, train, and evaluate the model, resulting in optimized performance and scalability.
- Contributed to wildlife research by enhancing species identification accuracy by 20%, with plans to scale the model for integration into mobile applications for field researchers.

### HeartGuard

*January 2024 - February 2024*

- Engineered a heart disease prediction model using K-Nearest Neighbors (KNN), achieving 83% accuracy in predicting disease risk based on a dataset of 300+ health records.
- Applied data preprocessing and feature selection techniques, increasing model accuracy by 15%, and implemented a user interface for streamlined predictions.
- Developed a tool that supports early detection of heart disease, potentially improving patient outcomes by enabling timely interventions, with future plans to deploy the model in a web or mobile platform for real-time use.

## Technical Skills

**Languages:** Python, C, C++, HTML/CSS, JavaScript, SQL, Matlab

**Developer Tools:** Visual Studio Code, Jupyter Notebook, Google Collab

**Technologies/Frameworks:** Windows, Linux, Ubuntu, GitHub

**Soft Skills:** Leadership, Teamwork, Event Management

## Achievements & Extracurricular

- Solved over 300+ data structures and algorithms problems on competitive coding platforms such as LeetCode, CodeChef, Coding Ninjas, and GeeksforGeeks.
- Active contributor to AAVESH (Electronic Society), engaged in workshops, seminars, and technical projects, fostering a collaborative learning environment.
- Served as Design Head for FORCE (Technical Society), leading the creation of visual content and contributing to the success of cultural and technical events.
- Achieved 20th rank out of thousands of participants in the nationwide coding contest CODE-RUSH, hosted by Algo University.
- Secured 1st place in the Scavenger Hunt at MERAKI TechFest, held by IIIT Una, demonstrating problem-solving skills in a competitive setting.
- Organized Robo Soccer under the AAVESH Society, attracting participation from 45+ students, and fostering interest in robotics and team collaboration.
